Test Type Legend

Type	Description
Functional	Verifies the feature works as specified
Negative	Verifies the system handles invalid input or edge cases correctly
Validation	Verifies input rules and constraints are enforced
Security	Verifies access control, authentication, and data protection

Type	Description
Integration	Verifies communication between system components and external services
Conditional	Verifies logic that depends on specific conditions (gender, grade level, etc.)

Priority Legend

Priority	Description
High	Core functionality; failure blocks system use
Medium	Important feature; failure degrades experience
Low	Minor feature; failure has minimal impact

Status Legend

Status	Meaning
PASS	Feature works as expected
WARNING	Feature works but has a known limitation or recommendation
FAILED	Feature does not work as expected
